

set_fixed_objects

NAME

set_fixed_objects
Sets the specified objects to the fixed state. The command sets the value of physical_status attribute to either fixed or unrestricted;

SYNTAX

status set_fixed_objects
[object_list] [-unfix]

object_list collection or selection

ARGUMENTS

object_list
Collection or selection set containing objects to set or unset fixed status. If this option is not specified, global selection set is used.

-unfix Specifies if given objects should be unfixed

DESCRIPTION

Set the fixed state for the supplied objects.

EXAMPLES

The following example fixes all selected objects

```
prompt> set_fixed_objects  
1
```

The alternative syntax uses collection to specify objects.

```
prompt> set_fixed_objects [get_selection]  
1
```
